

OMAR M. ALJEBRIN

(+1)571-532-0291 oaljebri@gmu.edu

EDUCATION

George Mason University, Honors College, Virginia

January 2022 - Present

Bachelors of Science in Physics, Minor in Astrophysics

GPA: 3.78

RESEARCH EXPERIENCE

Undergraduate Research Assistant, George Mason University

Advisor: Ferah Munshi

Jan 2025 - Present

Dark Matter: Studying how dark matter halo mass affects star formation by pinpointing the critical mass (M_{crit}) using simulations.

Advisor: Jie Zhang

May 2024 - Present

Space Weather: Propose functions to fit position-versus-time data of a coronal mass ejection (CME) and determine the times of transition between its slow rise, impulsive, and propagation phases.

EXPERIENCE

NASA L'SPACE Mission Concept Academy

Aug 2024 - Dec 2024

Participant - Team Role: Chief Scientist

- Gained hands-on experience in space mission concept formulation, focusing on science goals, objectives, and success criteria, while following the NASA mission life cycle up to the Preliminary Design Review.
- Led and supported the development of science goals and payload selection, ensuring alignment of engineering design with scientific objectives and coordinating landing site research.

HONORS & AWARDS

1st place poster in the COS URC Physical Sciences and Mathematics category

May 2025

Award Amount: 500\$

The award honors top undergraduate research in Physical Sciences and Mathematics for excellence in quality, presentation, and impact.

3rd Place, GMU Calculus Olympiad (Team)

May 2024

Dean's List**2023 – Present**

Cumulative GPA above 3.5

CONFERENCES & PRESENTATIONS

College of Science Undergraduate Research Colloquium**May 2025**

1. Title: How Low Can You Go? Investigating the Threshold Halo Mass for Star Formation
2. Title: Finding Piece-wise Kinematic Functions for the Full Evolution of Coronal Mass Ejections from the Sun

Honors Collage Exhibition**Dec 2024**

Title: Machine Learning and Superconductors: How can quantum machine learning improve the accuracy of predicting the critical temperature of superconductors?

AGU24, Co Author**Dec 2024**

Title: The Effect of Reference Map and Neighborhood Size on the Fractional Skill Score of Modeled Coronal Holes

SKILLS

Python

1 year of experience working with data analysis, simulation, and modeling. Packages: Numpy, Scipy, Pandas, Matplotlib.
